

The image features a stylized graphic of three green leaves with a wood grain texture, set against a background of yellow wood grain and white wavy lines. The leaves are positioned in the center-left, with one leaf pointing upwards and two others pointing downwards. The background is divided into a yellow upper section and a white lower section by a green horizontal line. In the top right corner, there are several thin, parallel lines forming a corner shape.

FALCON
AĞAÇ SANAYİ A.Ş.

Our family has been in the plywood industry for the past 20 years. After we noticed a great demand for plywood, we decided to expand the family business and the idea to create a new factory Falcon Aa Sanayi A.. was born. Falcon Aa Sanayi A.. is a fairly young but promising plywood factory, keeping up with new trends and new plywood production technologies.

We work to bring nature in the form of wood from the forest into your home through the use of plywood for your furniture or as a structure for your house.

DD-PAN

DD PAN boards are crafted from a blend of thin veneers, including pine, polar, and beech wood, through a meticulous process that involves pressing the layers at precise temperatures and pressures. DD PAN boards can be manufactured in diverse dimensions and thicknesses, with resin options that cater to humidity-resistant and water-resistant requirements, tailored to our customer's unique preferences.
