

FALCON PLYWOOD

DESCRIPTION	The construction of FALCON panel is mixture of different wood species plies such as birch, poplar, beech, pine, larch or alder wood veneers. Depends of demands. Face and back surface: 167 gr/m ² dark brown phenolic film. Side insulation: Water resistant silicone base protection. In falcon panels is used WBP glue							
APPLICATIONS	Construction and building, loading platforms, truck and trailer floors and wagons, furniture production							
FACE COVER	Phenolic film dark brown 167 gr/m ²							
GLUING	Conforms to EN 314 - class 2 or class 3 exterior standard, WBP glue							
SIZES	Standard sizes (mm)	2500 x 1250			2440 x 1220			
	Thickness	15		18		21		
	No. plies	7	9	7	9	11	11/13	
DIMENSIONAL TOLERANCE	Thickness	+/- 0.4 mm - +/- 0.5 mm						
	Length / Width	+ / - 1 mm						
MOISTURE	8-12%							
DENSITY	520-560 kg/m ³							
CERTIFICATIONS	Eurocert EQC				CE
